

e-Commissioning

Powered by

CONFIDENCE IN YOUR BUILDING PERFORMANCE

Efficient. Responsive. Expert.

Our e-commissioning service provides off-site, closed-loop equipment test procedures that are fully implementable at a distance with remote system connectivity. This service is built on an extensive field test protocol library, assured to deliver value and precision as nimbly as possible.

Features of our service

- Functionally test HVAC heating, cooling, and fan control
- Functionally test refrigeration compressors, valves and condenser fans
- Review all programming, settings and setpoints against the basis of design, engineering and owner standard documentation
- Maintain and accelerate construction schedule
- Document and submit open items log for field corrective action
- Add value by increasing efficiency, saving operational costs, and avoiding early repair and maintenance costs

For assured remote commissioning, trust e2s
