

Covid-19 HVAC Shield

Powered by

CONFIDENCE IN YOUR BUILDING PERFORMANCE

Protecting Your Occupants

We minimize the threat posed to building occupants by airborne infectious diseases like Covid-19 by ensuring proper ventilation and filtration are in place, thus reducing the risk of transmission through recirculated air. We have thoroughly researched CDC and ASHRAE guidelines and can advise you on applying the latest requirements across your building portfolio.

Features of our service

- National reach for building portfolio due diligence and action
- Team of seasoned engineers, PE and technicians
- NEBB/BCA/ACG Nationally Certified firm
- Specialty team with keen, real-world understanding of how large-scale commercial and industrial HVAC systems perform and should be evaluated and corrected to reduce the spread of infectious diseases
- Measure, verify and set fresh air intake to meet compliance standards
- Create filter requirement database for MERV-13 deployment
- Supply and fit Merv-13 filters across your portfolio
- Identify and resolve building pressurization issues
- Create occupant and customer comfort, safety, and confidence
