

Turn-key Energy Upgrades

Powered by

ENSURING BUILDING PERFORMANCE

Yielding more for less

We specialize in improving the energy efficiency of buildings to achieve maximum productivity and cost-effectiveness. We have a long and consistent track record and are trusted to recommend and implement the most fitting turn-key solutions. We work to meet organizational energy goals, reduce annual energy expense, and ensure energy savings delivered are sustained.

Features of our service

- 400+ years of built environment MEP/R & BMS experience
- Trusted team of advisors and project coordinators to manage, deploy and execute large scale multi-site upgrades
- Strong Quality Control with Engineers/Certified CxA and TAB in house
- Equipment right-sizing and selection, saving 5-10% of capacity
 - ▶ Full Lighting Upgrades and Retrofits
 - ▶ Adding Doors to Cases
 - ▶ Recommissioning
 - ▶ Building Automation/Control System Upgrades
 - ▶ Rack, Case and Condenser upgrades
 - ▶ HVAC/RTU/Critical Systems Upgrades
- Typical project paybacks between 2-5 years
- ROI of 20% and higher (in some cases more than 50% working with utilities)

For better returns from your buildings, trust e²s
